**STOCK and SON'S SOIL-PAN SERVICE-BOX.**  
 The object of this contrivance is to facilitate the introduction of sanitary improvements into the dwellings of the working classes, by the adoption of such an arrangement of cheap soil-pans as will enable the "constant supply system" of water to be made available for the removal of the refuse, by preventing the serious waste of water in places of this description, to which under com-  
 mon use so directly and so properly object. By the use of this service-box an ample supply of water is obtained, without the possibility of its being wasted by stopping the valve, weighing the handle, or by other means. It is so constructed that, so long as the discharge-valve remains open, the water will continue to enter the service-box from the main—drawings and description may be obtained from STOCK and SON, manufacturers of plumber's brass-  
 work, gas-fittings, and other furniture, in iron and brass, Temple-  
 road, Birmingham.
